

I Add. Ms. b. 180

P.	1	Linear Substitutions (Hardy 1926)	
	3	Double points of the transformation	
	5	Classification of Linear substitutions	
	11	The Modular Group	
	17	Geometry of the Modular Group	
	25	Theorem	
	29	Modular Functions	
?	30	Definition of $g_{1/2}(w_1, w_2)$, $g_1(w_1, w_2)$	
	31	Lemma	
?	37	Expansion of the $g_n(w)$ as power series	
?	40	The function $\Delta(w_1, w_2)$	
?	42	The function $j(w)$	
	44	Theorem	
?	60	The inverse function $w(j)$	
	63	Picard's Theorem	
	65	Quadratic Forms. Definite forms. Equivalence	
	67	Connection with the Modular Group	
	70	Reduced forms	
	71	Double & triple equivalence	
	73	Classes of given determinant	
	74	Theorem	
	76	Representation	
	79	Proofs of special theorems	
	87	Theorems on the behaviour of analytic functions	
	88	Elementary results	
	93	Poisson's formula. Proof	
	96	Geometry of the Modular Surface	
	99	Modular surface of $e^{1/2}$	
	101	Theorem I	
	102	Theorem II. Proof. Theorem III. Proof	
	103	Theorem IV. Proof. Theorem V. Proof	
	104	Theorem VI. Proof. Sketch of the Elements of the	

Theory of Integral Functions

p. 106	Def. I. Def. II	1
107	Def. III. Fundamental Theorem	2
108	Theorem. Theorem VII	2
109	Proof. Theorem VIII	11
110	Proof.	17
112	Harmonic Functions. Theorem I'. Proof. Theorem II'	20
113	Sub-harmonic and Superharmonic Functions. Df.	
114	Theorem	26
118	Theorem IV. Proof I	18
119	Proof II	23
122	Mean Values. Theorem X. Proof	24
124	Df.	24
126	Jensen's Theorem	24
129	Theory of Integral Functions	26
136	Theorem	28
137	Proof	28
139	Proof of Stirling's Theorem	28
145	The Indices of an Integral Function. Definitions	29
? 147	Infinite Indices μ, ν	29
148	Theorem I	29
155	Theorem I	34
156	Proof	34
158	Theorem II. Proof. Examples	35
161	Zeros and the λ -index	35
165	Theorem I. Proof	38
168	Note on Jensen's theorem, and an Application	38
171	Normal functions	38
173	Df.	38
174	Theorem II	39
175	Proof. Lemma	39
179	Epilogue. Rolle's theorem for integral functions	40
180	Theorem	40

p. 183	Power Series and the Circle of Convergence: Miscellaneous. Introductory
184	Hadamard's Luckensatz
185	Ostrowski's Proof: the "Super-summability Theorem"
186	Proof
193	Fatou's Theorem. Proof
199	Polya's Theorem. Proof
203	Vitali's Theorem. First Proof
210	Montel's Theorem
213	Second Proof of Vitali's Theorem. Lemma I.
215	Lemma II
218	Proof of the Main Theorem
223	Hadamard's theorem on the Multiplication of Singularities
227	Schottky's Proof of Picard's Theorem. Preliminary
230	Lemma I
231	Lemma II. Lemma III
232	Proof
234	Fundamental Inequalities
242	Applications of the Fundamental inequalities
251	Index to Vol. II
